

## The Rodents Formula

« Our rodents, rats and mice, will make a wide detour to avoid the Mint, even if they have to change their habits! »

You can quickly make these unwanted visitors understand that you want to claim your home, garden, and outbuildings. »

**Ingredients :** Essential Oils of Peppermint and of Spearmint.

**Presentation :** 10, 15, 20, 30, 50 and 100 ml glass bottles.

**Shelf Life :** needs to remain tightly closed and stored away from light and heat. Best if used within 3 years after the manufacturing date printed on the label.

### Instructions:

The use of essential oils is not intended to decimate the population of rodents which visit your houses, barns, stables and gardens. This is a natural way to change the habits of those visitors, once you know their favorite spots.

It is mostly the smell of Mint that repels Rodents. You will need to use relatively concentrated dosages of this formula.

To prevent the passage of Rodents through particular spots, such as pipes crossing a wall, cracks in walls, it is possible to pour a **few drops** of pure oil on a cotton ball and stick it into the crack.

For more extended, or harder to reach areas, you will make a spray using a vaporizer, with the following dosage:

- **40 drops** of The Rodents Formula, to dilute in,
- **45 ml** (3 tbsp.) of alcohol, to dilute in,
- **100 ml** of water.

Be sure to follow each of those preparation steps, ensuring good dispersion of essential oils in your final blend. Agitate the container before each use.

Then spray it in the paths and places which are the most frequented by the unwanted visitors.

## ***Frequency of use:***

Depending on what you observe. Do not hesitate to repeat the operation until your Rodents decide to stop bothering you.

## ***Precautions:***

Concentrated or diluted product: do not ingest. Avoid contact with eyes and mucous membranes. Keep out of the reach of children.

## ***Tips about « sprays »:***

There are two ways to make sprays with essential oils. Read carefully.

***Sprays made with alcohol:*** the first step consists in thoroughly diluting the essential oils in pure alcohol, bought in pharmacy, or drugstore. The second step consists in adding this blend in the water contained in your vaporizer. Shake well. You do not have to use the vaporizer's content all at once. It can be stored, but you need to remember to shake the bottle before each use.

***Sprays made without alcohol:*** for single use only, you can prepare a spray with warm water, not boiling, in which you pour your essential oils. It is very important that you shake your container before and during use.

## ***Caution:***

Avoid spraying your preparation in the direction of another person or pet. Alcohol and certain essential oils are irritants.

Do not spray your essential oils towards a flame, especially if you used alcohol for their dilution.

Do not spray your essential oils on your food, or on pet food.

Avoid spraying water on wooden furniture, waxed, polished wood, etc. to avoid stains. If you often spray essential oils in your home, it is best to use distilled water or demineralized water, so as not to leave marks on your furniture, curtains, floors.
